

# Driving Oncology Research Forward

Leading researchers choose Quorum Review IRB to advance their research. Quorum focuses on prompt reviews to help lead oncology research to cures.

## On the Cutting Edge

- Our Cambridge oncology board was founded in 2011 to focus on oncology studies, and today, all of our boards leverage the expertise of our oncology specialists to provide prompt review of complex oncology studies.
- Oncology-qualified boards at Quorum have over 100 years of cumulative experience in cancer treatment and research.
- Our boards have reviewed studies of the most innovative therapeutic strategies in the field in all research phases, including:
  - Immunotherapy
  - Gene Transfer
  - Radiotherapy
  - Antibody-Drug Conjugates
  - Targeted Therapy
  - Cancer Diagnostics
- Hundreds of dedicated oncology research sites partner with Quorum because we care about your research.

This graph represents areas of oncology research reviewed by Quorum since 2010.

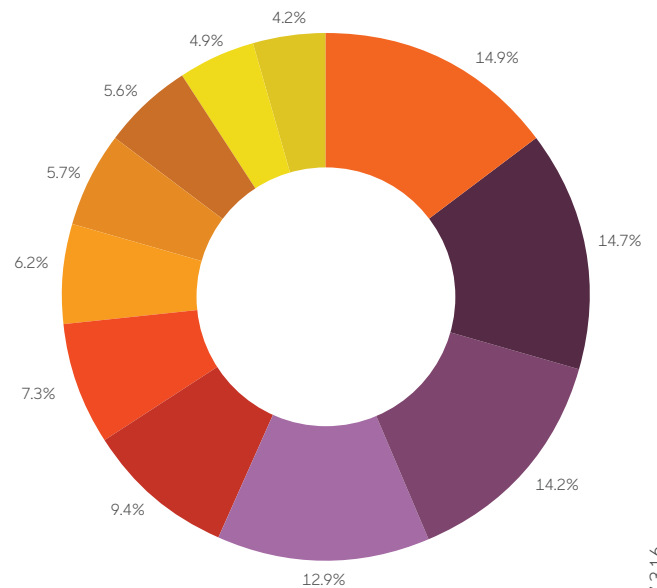

- Hematologic/Blood
- Breast
- Respiratory
- Other
- Prostate
- Skin
- Digestive/Gastrointestinal
- Neuroendocrine
- Musculoskeletal
- Lymphatic
- Gynecological

## One-Touch Collaboration

One-Touch Collaboration builds flexibility and timeliness into your research reviews for improved participant protection, increased efficiency, faster study startup, and consistent benefits for all sites:

- One price
- One study contact
- One study startup timeline
- One board

One-Touch Collaboration is the reason **Quorum is the most preferred central IRB**—it is our goal to build a collaborative community, proactively facilitate your study experience, and deliver unmatched support.
