

# eConsent – Site Readiness

Is your organization eConsent ready? More and more sponsors prefer to work with sites that are able to use an eConsent system.

## How Kinetiq Helps

Our out-of-the-box toolkit promises a smooth transition from paper to electronic consent. Kinetiq not only makes sure your site is compliant, we ensure it is operationally efficient. Our team, templates, and tools help you tackle the challenges that come with transitioning from paper to eConsent.

## Why Prepare for eConsent?

- eConsent technology has arrived
- Sponsors prefer to work with eConsent-ready sites
- Improve site enrollment

## Talk to Your Sponsor Today

Don't lose out on research opportunities because your site isn't eConsent ready!

## Readiness Assessment

### Identify gaps in policy, procedures, and compliance.

Our clinical operations specialists conduct a site readiness assessment. You will receive a comprehensive gap analysis and remediation plan if necessary, including a checklist to evaluate your eConsent readiness.

## On-Site Training

### Prepare your clinical operations teams.

Our subject matter experts provide on-site training to help your research site staff understand how eConsent technologies work, what regulations apply, and how IRBs review eConsent systems. We also make recommendations on how to improve patient retention and recruitment.

## Remediation

### Demonstrate your commitment to 21st century consenting.

Our consultants support your site through all phases of remediation and readiness for eConsent providing custom solutions, including:

- Template SOPs, procedures, and practices
- Compliance analysis
- Operational efficiency
- Integration with CTMS and other site systems
