

Quorum Advantage Program

Add value to your clinical trial before it begins. Drive efficiency into every stage of the IRB approval process.

For Your Study

Dedicated Account Manager

Early engagement with your dedicated Quorum Study Manager ensures we exceed your study startup expectations.

Pre-Submission Board Chair Protocol Assessment

Enhance your research and accelerate the review process. Our Board chair assesses your protocol in advance and makes recommendations to prepare it for submission.

Accelerated ICF Editing

Quorum gives your study a head start by preparing your consent form(s) before you formally submit your protocol for review. You only need a draft protocol to get started.

For Your Sites

Site Match™

Through our premier site directory, Quorum delivers a customized list of investigators based on your individual study criteria to help you find the right sites for your studies.

Site Outreach

Quorum manages communications with Site Match selected sites on your behalf. This outreach efficiently determines if sites are interested in participating in your studies.

Site Startup

Site Activation – Once your sites are identified, we assist with their application and provide personalized support through the submission process.

Site Migration – When you submit a related study or extension trial to Quorum, we accelerate site activation and save investigators time by transferring site summary information from previous study submissions to new submission forms.

Form Migration – When you transfer studies to Quorum, we accept documents from other IRBs and migrate the site summary information onto our forms.

Starting a Study?

Quorum offers a full spectrum of complementary services designed to streamline the submission and review processes. Experience the Quorum difference!
